

Turn the new site into enquiries.

The website is now strong enough to show prospects. The next job is distribution: get found by Malaysian SME owners, make the financing offer clear, and convert warm attention into WhatsApp consultations.

Current status

- Website UI bugs fixed: service-card layout, logo path, and about photo path.
- SEO basics added: canonical, Open Graph, structured data, robots, and sitemap.
- Content migration added: original page slugs, service detail pages, support hub, eligibility page, calculator page, and article hub.
- Recommended next: connect real domain, Search Console, GA4, and Google Business Profile.

What was checked and fixed

Pass

Hero video, EGA logo, about photo, nav anchors, WhatsApp/social links, and all 8 sections render locally.

Pass

Calculators live-update and the verified loan math test suite passes.

Pass

Responsive audit passes at 375px, 1024px, and 1440px with no horizontal overflow.

● MONTHLY SEO SYSTEM

The monthly operating rhythm

WEEK	WORK	OUTPUT	WHY IT MATTERS
Week 1	Review Search Console, GBP performance, WhatsApp enquiries, and rankings.	One monthly scorecard and 3 priority fixes.	Do not chase random keywords. Let search data and enquiries decide the next work.
Week 2	Publish one high-intent financing page or article.	Example: "Business loan rejection in Malaysia: what to prepare before reapplying".	Google recommends useful, unique, people-first content, not thin keyword pages.
Week 3	Update Google Business Profile and request reviews from suitable clients.	4 GBP posts, fresh photos, review replies, and complete business info.	Local visibility is driven by relevance, distance, and prominence.
Week 4	Repurpose the monthly topic into social and short-form assets.	1 LinkedIn post, 1 Instagram carousel, 1 short video script, 1 WhatsApp follow-up angle.	SEO compounds slowly; social and partner traffic create faster discovery.

Best traffic mix for EGA

1. Google Search

Build service pages around intent, not volume. Start with SME business loan consultant, working capital financing, equipment financing, grant financing, factoring, P2P financing, halal financing, and business loan rejection support.

2. Google Business Profile

This should become Jay's local trust surface: complete info, recent photos, weekly posts, review replies, service categories, and clear appointment/WhatsApp path.

3. LinkedIn and founder-led posts

Post practical financing breakdowns for founders, accountants, SME owners, and business consultants. Do not write generic "we help businesses grow" content.

4. Referral partners

Accountants, company secretaries, insurance agents, real estate agents, SME consultants, and equipment suppliers can send higher-intent leads than broad social posting.

5. Low-budget search ads

Use only for high-intent terms once conversion tracking is installed. Send traffic to one tight page with WhatsApp click tracking, not the homepage by default.

6. Case-story assets

Publish anonymized before/after stories: funding problem, documents missing, route chosen, time to approval, and lesson learned. No fake claims, no guaranteed approval language.

● MIGRATED PAGES

Pages added after the one-page site

SME business loan consultant Malaysia

Working capital financing Malaysia

Equipment financing Malaysia

Invoice factoring Malaysia

Business loan rejection help

Government grant financing

Halal financing advisory

P2P financing advisory

Business loan checklist

Puchong SME financing advisor

● GPT IMAGE CONTENT ENGINE

Weekly content automation engine

Goal: one financing lesson becomes five assets every week.

The engine should not mass-produce generic financial quotes. It should turn Jay's actual advisory knowledge into clear, trust-building content.

Inputs

- One real client question or anonymized financing situation.
- One financing route: bank, grant, factoring, P2P, halal, koperasi, or equity.
- One caution: documents, cash flow, CTOS/CCRIS, collateral, approval risk, or timeline.
- One CTA: WhatsApp Jay for a financing route check.

Outputs

- LinkedIn post for business owners.
- 5-slide Instagram carousel using GPT Image in EGA navy/gold/cream.
- 30-second short-video script with captions.
- Google Business Profile post.
- WhatsApp broadcast angle for warm contacts.

Reusable GPT Image prompt

Create a premium financial advisory carousel slide for Exclusive Global Advisory. Brand colors: deep navy #0A2643, champagne gold #D4B86A, cream #FDF8F0. Topic: [weekly financing lesson]. Audience: Malaysian SME owners. Style: clean editorial business design, no stock-photo cliches, no fake cheques, no luxury cars, no guaranteed approval wording. Include one clear headline, one simple visual metaphor, and space for the EGA logo. Make it trustworthy, calm, and readable on mobile.

● 90-DAY PLAN

What to do next

PHASE	PRIORITY	DELIVERABLES	DECISION GATE
Days 1-14	Make the site measurable.	Real domain, Search Console, GA4, WhatsApp click events, sitemap submitted, GBP complete.	Can we see impressions, clicks, and WhatsApp starts?
Days 15-45	Build the first content cluster.	4 high-intent pages, 4 GBP posts, 4 LinkedIn posts, 4 GPT Image carousels.	Which topic gets the best clicks or enquiries?
Days 46-75	Add proof and partner traffic.	2 anonymized case stories, 20 referral partner outreach messages, 1 business loan checklist.	Are enquiries coming from search, social, or partners?
Days 76-90	Scale what worked.	Refresh the top pages, add FAQs, test one paid-search landing page, publish month-end report.	Keep, cut, or double down by channel.

● KPIS

Monthly reporting dashboard

Search

Impressions, clicks, average position, indexed pages, top queries.

Local

GBP profile views, calls, website clicks, direction requests, reviews.

Sales

WhatsApp starts, qualified enquiries, consultation bookings, closed funding cases.

● IMPORTANT GUARDRAILS

Claim safety for finance content

Use

- "Funding route check" instead of "guaranteed approval".
- "Subject to lender approval" on calculators and financing examples.
- Real client outcomes only, anonymized when needed.
- Clear disclaimers when content is educational.

Avoid

- Guaranteed approval, guaranteed rates, or guaranteed timelines.
- Fake screenshots, fake bank letters, or invented case studies.
- Thin AI-generated articles that repeat the same advice.
- Mass content across unrelated finance topics.

Prepared for Dainer and Jay on 23 June 2026. Original WordPress sitemap/API access was password-protected during the migration pass, so the new pages preserve the discoverable slugs and service categories while using cleaned, finance-safe copy. This report is an operating plan, not a ranking guarantee. SEO results can take weeks to months and should be measured through Search Console, Google Business Profile, GA4, and WhatsApp enquiry tracking.
